Dollhouse & Wargaming Miniatures

*Frostgrave – Fantasy Wargames in the Frozen City by Joseph A. McCullough and its supplements are published by Osprey Publishing. This kit is inspired by the descriptions found in these works.*

## Haunted Houses

Please read the instructions before starting construction.

When opening the kit you will notice the smell of burned wood. This is because the parts are laser-cut, which literally means a very tight light beam burns through the material. You may also notice some soot at the cut edges. The amount of soot depends on the material used. You can considerably reduce it by gently wiping at least the bigger and easy to reach edges with a soft cloth or household tissue.

PVA or equivalent glue will be required to glue parts together. Give glue enough time to dry. Wipe away any excess glue immediately using a fine cloth or the tip of a toothpick. A sharp hobby knife is needed to remove parts from the sheet. Be careful and always cut away from your body. Fine sand paper may be useful to clean these areas or any tight fitting joints. Clamps, pegs and elastic bands may help during the construction of the kit. Make sure that the parts are aligned correctly before applying any of these tools.

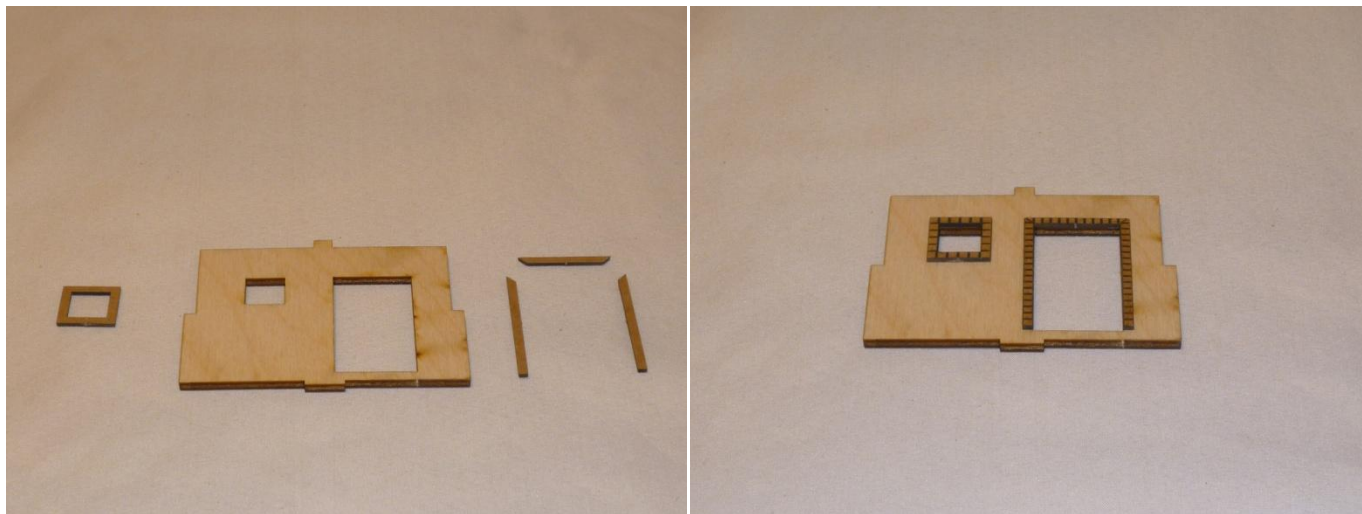

## General pre-assembly preparations

You will achieve the best results in finishing this kit when you follow the steps listed below. Always double check with the provided pictures before gluing parts together and moving on to the next step.

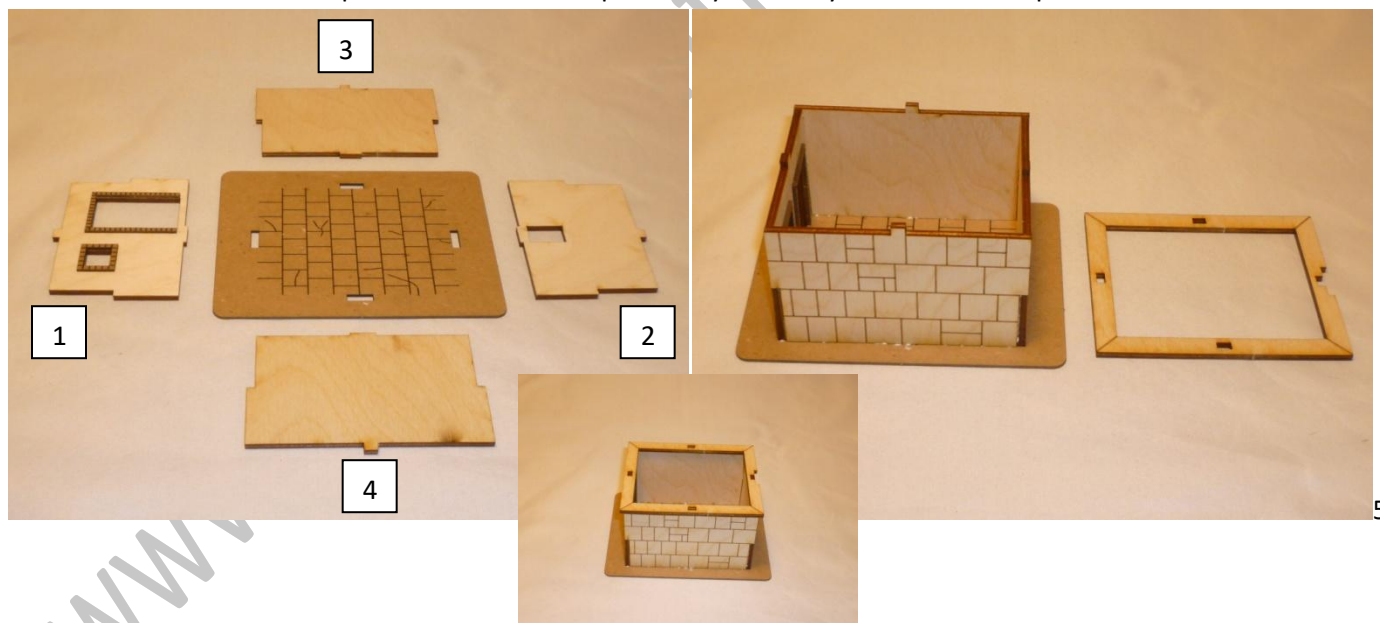

Please keep in mind that - in general - engraved sides of parts are considered “outside”; not engraved sides are “inside” or positioned less visible once the kit is finished.

## Assembly

Glue door and window frames on the inside wall as shown in the picture. Make sure to retain right angles.

Glue four walls on base in the order specified in the picture. Make sure to retain right angles. Then add upper end piece. Some of the walls are prepared to look partially destroyed. Just take out these parts by carefully cutting the small connection with a knife and proceed as described previously. You may use the cut-out parts as rubble.

**Tip:** To add more rubble and debris just cut some irregular pieces from the sprues and glue in place as desired.

Dollhouse & Wargaming Miniatures

Glue doorsteps in place – both inside and outside.

Now glue in fireplace as shown.

Dollhouse & Wargaming Miniatures

Glue together four chimney parts and top with edging. Then glue in place at back wall as shown.

Glue cornerstones in place on all outside corners of the house. Find the matching pieces to create a 90° angle and glue in place. Work your way around the whole building until all outside corners are covered.

If you ever experience problems or difficulties in finishing this kit don't become desperate! Just send me an email at [thingsfromthebasement@gmail.com](mailto:thingsfromthebasement@gmail.com) and I will help you get it done. Having designed the kit and then providing an instruction for everyone to understand is probably the hardest part of the whole project. I am ready for every kind of feedback to improve kit and instructions. I just need to know!
