

# The Legend of Riverfield

## Town House # 2

Please read the instructions before starting construction.

When opening the kit you will notice the smell of burned wood. This is because the parts are laser-cut, which literally means a very tight light beam burns through the material. You may also notice some soot at the cut edges. The amount of soot depends on the material used. You can considerably reduce it by gently wiping at least the bigger and easy to reach edges with a soft cloth or household tissue.

PVA or equivalent glue will be required to glue parts together. Give glue enough time to dry. Wipe away any excess glue immediately using a fine cloth or the tip of a toothpick. A sharp hobby knife is needed to remove parts from the sheet. Be careful and always cut away from your body. Fine sand paper may be useful to clean these areas or any tight fitting joints. Clamps, pegs and elastic bands may help during the construction of the kit. Make sure that the parts are aligned correctly before applying any of these tools.

### General pre-assembly preparations

You will achieve the best results in finishing this kit when you follow the steps listed below. Always double check with the provided pictures before gluing parts together and moving on to the next step.

Please keep in mind that - in general - engraved sides of parts are considered "outside"; not engraved sides are "inside" or positioned less visible once the kit is finished.

#### Assembly of doors and shutters:

Glue supporting bracket on inside (i.e. **not** engraved side) of door or shutter (only if applicable).

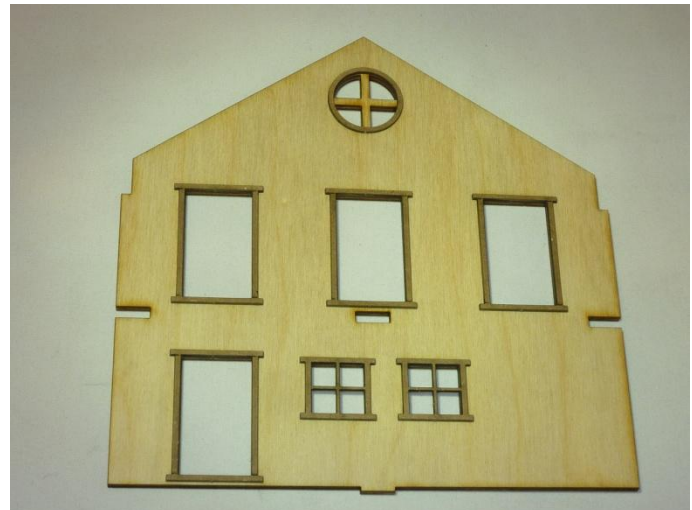

Glue handles on inside **and** outside of door (only if applicable).

Glue window frame on inside **and** outside of door (only if applicable).

#### Preparation of walls:

Glue door and window frames on inside (i.e. **not** engraved side) of walls where openings are. Frames match the size of the opening and will fit right around it.

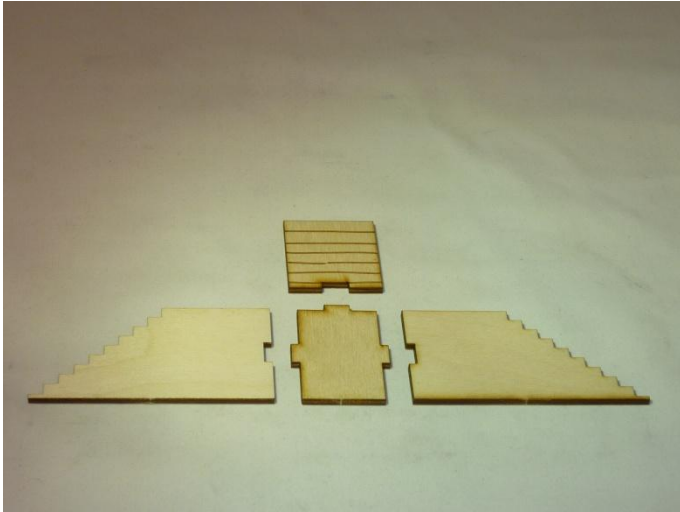

# The Legend of Riverfield

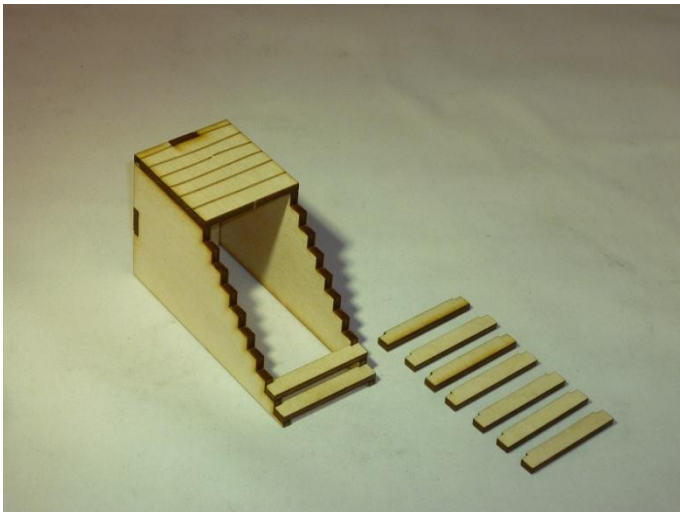

## Assembly

### Stairs:

Glue the four parts forming the stairs together as shown. Make sure to retain right angles.

Then glue in the treads starting at the bottom of the stairs.

# The Legend of Riverfield

Now turn it around and glue in the raisers. The smallest one fits underneath the lowest tread (green arrow).

Glue the siding on the outside of the completed stairs. Then add the three handrails as shown.

# The Legend of Riverfield

## First floor:

Glue the walls together and then on the base as shown in the picture. Make sure to retain right angles.

### Important:

Make sure to arrange the base and the parts as shown in the picture. Otherwise the building will not fit on the base!

Now glue the stairs in place.

Add door and window frames as shown.

# The Legend of Riverfield

## Second floor:

Glue the support on the underside (i.e. **not** engraved) of the second floor base. Align centered.

Glue the walls together and then on the base as shown in the picture. Make sure to retain right angles.

Add door and window frames as shown.

# The Legend of Riverfield

## Attic:

Glue support on underside of attic base. Align centered.

Glue the walls together and then on the base as shown in the picture. Then add roof ridge. Make sure to retain right angles.

# The Legend of Riverfield

Add the two roof parts aligning on roof ridge.

Glue together four chimney parts and top with edging. Slide chimney into roof opening.

Add window frames as shown.

# The Legend of Riverfield

## Cellar door:

Glue four wall parts together as shown. Then add double doors and handles.

## Outhouse:

Glue two short walls on base. Use engraved short wall in center slot. Top with seating.

# The Legend of Riverfield

Glue four side walls in place. Then add roof and door.

## Final stuff:

Add prepared doors, shutters and shop sign as desired. Glue together the sign holder as shown. Connect the sign with the sign holder using two pieces of chain provided in the kit.

For an even more detailed look you may want to add roof tiles. Different styles are available and sold separately at [www.thingsfromthebasement.com](http://www.thingsfromthebasement.com).

If you ever experience problems or difficulties in finishing this kit don't become desperate! Just send me an email at [thingsfromthebasement@gmail.com](mailto:thingsfromthebasement@gmail.com) and I will help you get it done. Having designed the kit and then providing an instruction for everyone to understand is probably the hardest part of the whole project. I am ready for every kind of feedback to improve kit and instructions. I just need to know!
